

Sanam Maharjan

Tarakeshwor-09, Kathmandu | maharjansanam92@gmail.com

Experienced QA Engineer with over a year of expertise in software testing and quality assurance. Skilled in creating detailed test plans and executing test cases using Selenium, Playwright, and Cucumber. Proficient in identifying software defects and ensuring product quality through effective testing methods. Experienced in Java, TypeScript, JavaScript and SQL, with a strong grasp of API testing using tools like Postman, Rest Assured, and Axios.

PROFESSIONAL EXPERIENCE

June 2023 - Present, YoungInnovations Pvt. Ltd.

QA Engineer I

- Collaborated closely with development teams to comprehend project requirements, strategize test approaches, and formulate comprehensive test plans.
- Generated detailed test cases and scenarios based on thorough analysis of requirements and design documentation.
- Conducted a wide array of testing types including functional, integration, regression, performance, and security testing to ensure robust software quality.
- Reported and tracked discovered defects or issues using a bug tracking system to facilitate timely resolution.
- Performed API testing using tools like Postman to validate endpoints, payloads, and responses, ensuring seamless integration and functionality.
- Utilized various testing frameworks and tools to develop and implement automated test scripts, enhancing testing efficiency.
- Fostered effective collaboration across cross-functional teams, including developers, product managers, and business analysts, to streamline testing processes and align with project goals.
- Remained abreast of industry trends, emerging technologies, and best practices in software testing and quality assurance to continually enhance skills and methodologies.

-

CURATED PORTFOLIO

MuAN Website (Municipality Association of Nepal)

Client: MuAN, Role: QA Engineer

MuAN (Municipalities Association of Nepal) serves as the umbrella organization representing all municipalities across Nepal. Their primary objective is to safeguard the common interests of municipalities through advocacy, lobbying, networking, and advisory support.

Career Service Center

Client: Skill Lab, Role: QA Engineer

Career Service Center (CSC) works to reduce the industry-academia gap witnessed in the work industry. CSC focuses on enhancing professional skills as well as soft skills valued in the workforce. They help students to find the right place of employment for them while helping organizations find the right fit for their teams.

Saarang

Client: Saarang team, Nepal; Role: QA Engineer

Their aim is to create an immersive experience where travelers discover local heritage through engaging stories and become part of unique local experiences, all while contributing to heritage preservation and supporting local economies.
